RAHMA MOHAMED MOHAMED

Front-End Developer | Systems & Computer Engineering
Cairo, Egypt | 01095091124 | rahmamohammed3456@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Front-End Developer and Systems & Computer Engineering graduate from Al-Azhar University (Ranked 3rd in class, 2026). Highly skilled in building responsive, high-performance, and user-centric web applications using HTML5, CSS3, JavaScript, and React. Successfully combines a rigorous engineering background and artificial intelligence expertise with practical front-end training from the Digital Egypt Pioneers Initiative (DEPI).

TECHNICAL SKILLS

- **Front-End:** HTML5, CSS3, JavaScript, React, Responsive Web Design, UI/UX Implementation
- **Programming:** Python, Java, C++, Object-Oriented Programming (OOP), Data Structures & Algorithms
- **AI & Data:** Scikit-learn, Pandas, NumPy, Machine Learning Models, Generative AI integration
- **Smart Home & IoT:** KNX, ETS6, Home Assistant, Raspberry Pi, Arduino, IoT Architecture
- **Tools & Workflow:** FastAPI, RESTful APIs, Git, GitHub Version Control, SQL Databases, Power BI

TRAINING

Front-End Development (React) — Digital Egypt Pioneers Initiative (DEPI) | Jul 2026–Present

- Completed advanced HTML5, CSS3, and JavaScript fundamentals, progressing rapidly through practical React component-based development, state management, and real-world project simulations.

Front-End Development (React) — Information Technology Institute (ITI) | 2026

- Completed the ITI React front-end program and finished it with a team graduation project (GlowCraft, see Projects).

PROJECTS

GlowCraft — Skincare E-Commerce Platform (ITI Graduation Project) — React, Vite, JSON Server | Live Demo | GitHub

- Built with a team of seven as the ITI React graduation project: a skincare e-commerce store with product browsing and filters, product page, cart and checkout, login/register with validation (guest vs. logged-in experiences), and an admin dashboard with full CRUD backed by a JSON Server API.
- Extra features: Skin Routine Finder, Ingredient & Expiry Tracker, Product Comparison & Wishlist; fully responsive, with dark/light mode and Arabic/English support.
- **My part:** developed the About page and the app-wide light/dark theme and Arabic/English language switching using React Context (ThemeContext, LangContext).
- Worked with Git feature branches, pull requests and code reviews on GitHub to deliver one consistent product from seven pieces; deployed live on Vercel.

Personal Portfolio Website — HTML5, CSS3, JavaScript | Live Demo

- Designed and coded a responsive personal portfolio from scratch with no templates or page builders, using semantic HTML5, CSS Grid/Flexbox and a mobile-first layout tested down to 375px.
- Built in vanilla JavaScript a light/dark theme toggle that saves the visitor's choice, a mobile navigation menu and a contact form that opens their email app; added keyboard-visible focus and reduced-motion support.
- Organized the code into separate HTML, CSS and JavaScript files with a compressed WebP hero image for fast mobile loading; deployed live on GitHub Pages.

Bakery Website — HTML5, CSS3 | Live Demo

- Built a fully responsive single-page bakery business website utilizing semantic HTML5 and advanced CSS3 Flexbox layouts.
- Implemented mobile-first responsive architecture with custom media queries aligned to Bootstrap breakpoints (576px, 768px, 992px).
- Integrated live Google Maps iframe for real-time location display and successfully resolved cross-section layout overlap issues.

Fokir — Portfolio-Style Website — HTML5, CSS3 | Live Demo

- Developed an elegant portfolio-style website featuring structured interactive sections including navigation, service highlights, project showcase, and contact form using clean CSS layouts.

Graduation Project — AI-Based Smart Home Automation using KNX | Project Demo

- Designed and implemented an advanced KNX smart-home control system, complete with ETS6 programming and robust integration with Home Assistant deployed on Raspberry Pi.
- Trained a Random Forest machine learning model on 90,000 synthetic records exposed via FastAPI to automate smart home scene predictions.

EDUCATION

Bachelor of Engineering — Systems and Computer Engineering | Al-Azhar University, Egypt | 2026

- Graduated with 93.130% (Ranked 3rd in class) — Excellent with Honors; Graduation Project rated Excellent.

CERTIFICATIONS

- KNX Certified Partner — KNX Association | Generative AI — NVIDIA/ITI | AI for You — Oracle
- IoT Fundamentals — MaharaTech | Embedded Systems Professional Training | Business English & Professional Soft Skills

EXPERIENCE & LANGUAGES

- **Quran Tutor (Children):** Taught Quran memorization and recitation, cultivating strong interpersonal communication, patience, and classroom management skills.
- **Languages:** Arabic (Native), English (B1 Intermediate professional proficiency)
